

2020 GHG EMISSIONS INVENTORY

purchased electricity
(home office spaces)

0.17 tCO₂e

furace oil
(home office space)

0.33 tCO₂e

business travel
(vehicle)

2.29 tCO₂e

solid waste

0.02 tCO₂e

water & wastewater

0.11 tCO₂e

business travel
(air)

0.42 tCO₂e

= 3.33 tCO₂e
total

reduction target:

50% below 2019 levels by 2023

Progress 2019 to 2020 = ~23% Reduction
primarily due to reduced business travel

Planned reduction actions:

- purchase of one electric vehicle to replace current gasoline vehicle used for primary employee/business travel - by 2023
- installation of solar panels at head office and premises - by 2023
- continuation of remote work for all new employees, avoiding day-to-day commuting in fossil fuel vehicles - through to 2023+

carbon offsets purchased

14 tCO₂e

10 tCO₂e local offsets
(generated in NL, CSA Certified)
4 tCO₂e international offsets
(Gold Standard, Fair Trade)
